

## **Maden Technologies Becomes a Qualified HSPD-12 Solutions Provider for GSA**

**ARLINGTON, VA December 12, 2006**—Maden Technologies, a leading integrator of outsourced information technology (IT) solutions has been qualified by the General Services Administration (GSA) under Special Item Number (SIN) 132-62. This qualification makes Maden Technologies an approved Homeland Security Presidential Directive 12 (HSPD-12) solutions provider.

HSPD-12 establishes the requirement of a mandatory Government-wide standard for secure and reliable forms of identification for Federal employees and contractors. OMB requires that agencies acquire products and services that are approved as compliant with Federal policy and standards. As the designated executive agency for HSPD-12-related IT acquisitions, GSA established SIN 132-62 on IT Schedule 70 for approved HSPD-12 implementation products and services. All services offered on SIN 132-62 have been evaluated and qualified by GSA to be in compliance with Government-wide requirements.

“I am extremely pleased that Maden Technologies is a designated GSA-approved vendor of HSPD-12 solutions,” said Mr. Omar Maden, CEO and founder of Maden Technologies. “This qualification validates Maden Technologies’ leadership in the identity management and information assurance markets, and assures our clients that we apply the latest technologies and best business practice services to ensure system-wide compliance. We are proud to be included on the Qualified HSPD-12 Service Provider list.”

To become a SIN 132-62 service provider, Maden Technologies had to meet GSA’s strict evaluation criteria of technical qualifications, staff experience, and proven relevant past performance. Services that Maden Technologies offers under GSA Schedule 70 SIN 132-62 include Personal Identification Verification (PIV) enrollment and registration, PIV system infrastructure, PIV card production and activation, PIV integration, and logical and physical access control. Maden Technologies is among a select group of firms that have the requisite qualifications to deliver these critical services.

Celebrating its 20th year in business, Maden Technologies is a leading integrator of outsourced IT solutions. Maden Technologies offers its clients a full suite of information assurance services, technology solutions that include HSPD-12 and identity and access management, operations and security services, network engineering, security protocols, and learning services. Additional related services encompass Internet, software, and telecommunications. Maden Technologies is a Service-Disabled Veteran-Owned Business and serves the Federal Government, state and local governments, and private industry.
