

## **Maden Technologies Partners with BaiCar International for Financial Sector Solutions**

**ARLINGTON, VA November 18, 2008**—Maden Technologies, a leading integrator of outsourced information technology solutions, announces its partnership with BaiCar International, a leading firm for financial advisory services. This alliance combines our experience in responding to national financial crises, dating back to the creation of the Resolution Trust Corporation in the mid-1990s.

BaiCar International brings a deep understanding of the Mortgage Backed Security (MBS) market. Maden Technologies has a proven record in support of the Mortgage Backed Securities Information System (MBSIS) and highly specialized information technology skills in support of the Government National Mortgage Corporation (GNMA), FDIC, and the Department of Education National Student Loan programs. Our combined team experience is well positioned to respond to the Troubled Assets Relief Program (TARP).

### ***The Challenge***

To deliver a critical decision support information system for the long-term management of the funds authorized by Congress under the Emergency Economic Stabilization Act of 2008, also known as TARP.

### ***The Solution***

Maden Technologies has developed a highly efficient state-of-the-art decision support system that processes information derived from commercial and government databases. Our system is designed to help government and private entities determine the most efficient means of addressing the mortgage crisis. It is based on market-proven solutions already available in the largest and most intricate business-to-consumer conditions. Our solution delivers relevant searches at speeds exceeding 100 million records per second.

### ***Our Track Record***

Maden Technologies has achieved world-rank status in supercomputers and delivered large-scale projects over the past 23 years.

We offer our clients a full suite of learning services, information assurance services, and technology solutions, including identity and access management, operations and security services, network engineering, and security protocols. Other related services encompass Internet, software, and telecommunications. Maden Technologies is a Service Disabled Veteran Owned Small Business that serves the federal government, state and local governments, and private industry.
