

Maden Technologies Partners With Lion Leaders

ARLINGTON, VA March 31, 2006—Maden Technologies, a leading integrator of outsourced information technology solutions, announces their partnership with Minneapolis-based Lion Leaders, a leadership and organizational development consulting firm. The alliance unites Maden Technologies' development of leading-edge technology solutions with Lion Leaders' world-class leadership development programs.

Maden Technologies has received international recognition for its innovation in technology solutions for over 20 years. Offering progressive tools and techniques, Maden Technologies has successfully delivered e-learning solutions to hundreds of thousands of businesspeople worldwide. Lion Leaders' international presence perfectly complements the global reach of Maden Technologies.

“This partnership has the potential to dynamically change the way organizations learn. Our proven methodologies combined with Lion Leaders' Full Impact Leadership Approach promise to be a winning team!” said Mr. Omar Maden, CEO and President.

Lion Leaders' customized leadership development services, world-class coach consultants, and action learning series round out this comprehensive e-learning component. Going beyond the classroom and early computer-based training (CBT), Maden Technologies' and Lion Leaders' tailored e-learning services incorporate all available technologies, optimizing an organization's learning experience while directly contributing to the bottom line.

“In this time of rapidly changing technology—speeches are delivered on podcasts and seminars are webinars—good instructional design is no longer enough. Learning must be delivered through accessible, secure technology supported by an innovative team,” added Mr. Maden.

Celebrating its 20th year in business, Maden Technologies is a leading integrator of outsourced information technology solutions. Maden Technologies offers their clients a full suite of learning services, information assurance services, and technology solutions, including identity and access management, operations and security services, network engineering, and security protocols. Other related services encompass Internet, software, and telecommunications. Maden Technologies serves the federal government, state and local governments, and private industry and is a Service Disabled Veteran Owned Business.
